EDUCATION

Ramaiah Institute Of Technology
BE, Artificial Intelligence and Data Science

Bangalore, India
DEC 2021 – JULY 2025

EXPERIENCE

Full Stack Developer

Sep. 2023 – Sep 2023

Kannada Ganaka Parishat

Remote

- Spearheaded the development of a cutting-edge platform enabling real-time audio transcription from Kannada to English, utilizing React and Flask technologies.
- Seamlessly integrated REST API with the frontend, ensuring smooth data exchange and optimal user experience.
- Orchestrated the deployment of the React application, ensuring accessibility and performance.

Student Intern

Mar 2024 – Sep 2024

Samsung Prism

Remote

Backend Intern

Sep 2024 – Present

Synthiq.io

Remote

- Designed and implemented robust backend services for call analytics using Express.js, integrating Supabase for data storage and handling, optimized query performance and real-time data synchronization.
- Developed role-based access control and authentication systems with Clerk, integrating LinkedIn and Google login to manage user roles, enhancing data security and access management.
- Integrated third-party APIs for email notifications, enabling automated and event-triggered email communication to enhance user engagement and system alerts.

PROJECTS

Farm Financer | *Firebase, VS Code, GitHub, Git, Dart, Flutter, Streamlit, OpenAI*

Nov 2023

- Developed an AI-driven farming app, addressing challenges of user adoption and diverse linguistic needs while streamlining financial tracking and providing personalized guidance.
- Successfully overcame hurdles in government collaboration, educational barriers, and data collection, enhancing accessibility and effectiveness of interpreting government schemes.

Intelligent Insights | *ReactJS, ExpressJs, AWS, Redis, Python, MongoDB*

Jan 2024

- Developed an AI-driven platform integrating advertising, analytics, content creation, optimization, and CRM, streamlining workflows and boosting marketing efficiency.
- Enhanced decision-making and customer engagement by unifying fragmented tools into a cohesive platform, improving content strategies and CRM practices for competitive market positioning.

NextGenCarrear | *ReactJS · Solidity, LangChain, Llama, NodeJS, Redux, NLP, MongoDB, Streamlit*

May 2024

- Created NextGen Career Hub, a cutting-edge platform revolutionizing talent acquisition with AI-assisted resume screening and a Professional Empowerment Hub for Women.
- Implemented a Blockchain-integrated project gallery to address specific challenges in the professional journey, enhancing transparency and trust in project showcases.

ACHHIEVEMENTS

- Streamlit track winner at RevaHack 2023
- Rajasthan Police Hackathon - 1.0 Finalist
- IISC Pravega Cognavi Ascend Finalist Top-10
- Presented a paper on "Utility Model for Visual Recognition using Enhanced Long-term Recurrent Convolutional Network" at ICRASET, showcasing expertise in advanced visual recognition technologies.
- Ludwig 10k Stars LLM Fine-tuning Hackathon Winner

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS, Dart

Frameworks: React, Node.js, Flask, Flutter, FlutterFlow, Firebase, Supabase, MongoDB, Redis, AWS, ExpressJS

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Linux
